

**VIP4 - Newsletter #2 - 05/2026**

Düsseldorf, 1st May 2026

Dear colleagues,  
following the successful enrolment of our first patient in April, recruitment for the VIP4 study is now actively ongoing across participating sites. We are pleased to see that centers in Germany, Sweden, and Turkey have already started enrolling patients. Since the study launch, additional centers have initiated their local setup, while others are in the process of obtaining ethical approval and finalizing contracts. This marks an important transition from preparation to active recruitment and the beginning of data collection within a growing international collaboration!

**We would like to sincerely thank all participating centers for their commitment and support in making this possible.**

After registration, you received an individual ICU code and a personalized link to your patient overview. Using this link, you can easily enter and edit the data of your enrolled patients at any time.

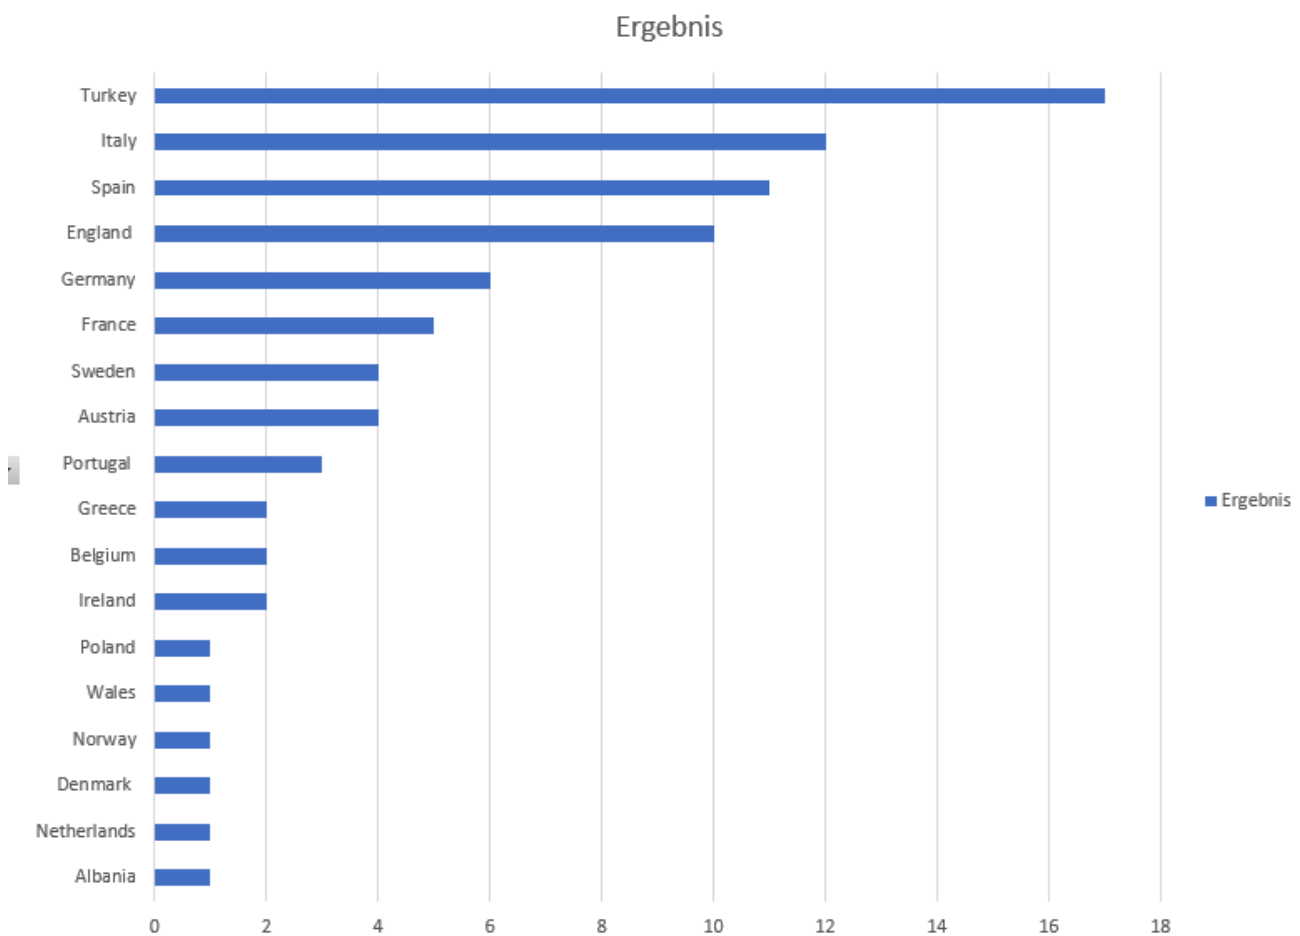

### Center recruitment update

We are happy to report that a total of 83 study centers have been successfully registered for the VIP4 study to date!

Among participating countries, Turkey currently leads with the highest number of registered centers, highlighting a particularly strong engagement in the study, followed by Italy, where a notable increase in registrations has been observed over the past two weeks.

**We would like to thank all participating sites for their commitment and look forward to further expanding the study network in the coming months!**

#### Join the VIP4 Study!

We are continuously welcoming new centers to join the VIP4 study. Institutions interested in participating are warmly invited to register via:
